Department of Planning and Development

D. M. Sugimura, Director

**CITY OF SEATTLE  
ANALYSIS AND DECISION OF THE DIRECTOR  
OF THE DEPARTMENT OF PLANNING AND DEVELOPMENT**

**Application Number:** 3009998  
**Applicant Name:** Joe McKenny  
**Address of Proposal:** 4850 Green Lake Way North

**SUMMARY OF PROPOSED ACTION**

Land Use Application to subdivide one parcel into seven parcels of land. The construction of live-work units has been approved under construction application #6062872.

The following approval is required:

**Short Subdivision** - to subdivide one existing parcel into seven parcels.  
(Seattle Municipal Code Chapter 23.24)

**BACKGROUND DATA**

Zoning: NC2-30  
Date of Site Visit: October 15, 2010  
Uses on Site: Seven live-work units under construction (associated with MUP #3004778 and building permit #6062872)

**Substantive Site Characteristics:**

The 7,778 square foot corner site is located diagonally facing Green Lake Way N with N 49th St to the north and Stone Ave N to the west.

The site is relatively flat, with some sloping to the northeast (no mapped or observed Environmentally Critical Areas on or adjacent to the site). The site is zoned Neighborhood Commercial 2 (NC2-30), which continues to the east. Single Family 5000 (SF 5000) zoning is located to the west, Multifamily Lowrise Residential (L-2) to the north, and Multifamily Lowrise Residential (L-1) to the south.

Surrounding uses include a mix of retail, restaurant, multi-family residential, and single family residential. Commercial and multi-family uses are located to the east on Green Lake Way N and Stone Way N, with single family and multi-family development to the north, west, and south.

**Public Comment:**

Notice of the proposal was issued on October 29, 2009. No public comments were offered.

## **ANALYSIS - SHORT SUBDIVISION**

Pursuant to SMC 23.24.040, the Director shall, after conferring with appropriate officials, use the following criteria to determine whether to grant, condition, or deny a short plat.

*1. Conformance to the applicable Land Use Code provisions;*

The subject property's zone (NC2-30) is intended for neighborhood commercial residential uses such as live-work units. The lots created by this proposed division of land would conform to this requirement and all applicable development standards of the NC2-30 zoning district. The proposed parcels would provide adequate buildable area to meet applicable Land Use Code development standards.

*2. Adequacy of access for vehicles, utilities and fire protection, as provided in Section 23.53.005;*

The Seattle Fire Department has reviewed and approved the proposed short plat for emergency vehicle access, subject to future development meeting Seattle Fire Code requirements.

*3. Adequacy of drainage, water supply, and sanitary sewage disposal;*

This area is served with domestic water, sanitary sewer, and storm drain facilities by the City of Seattle. Availability of service is assured subject to standard conditions of utility extension.

Seattle Public Utilities reviewed the short plat application, and Water Availability Certificate # 20090513 was issued on October 23, 2009.

The applicant may contact DPD Sidesewer and Drainage Counter for sidesewer permit requirements.

*4. Whether the public use and interests are served by permitting the proposed division of land;*

An objective of the short subdivision process is to increase opportunities for new housing development to ensure adequate capacity for future housing needs. The proposed short subdivision would meet applicable Land Use Code provisions: the proposal has adequate access for vehicles, utilities and fire protection, and has adequate drainage, water supply and sanitary sewage disposal.

The public use and interest would be served by this proposal because additional opportunities for live-work units would be provided within the City limits as a result of this subdivision. Furthermore, upon completion of the conditions in this decision, the proposal would meet all applicable criteria for approval of a short plat.

*5. Conformance to the applicable provisions of SMC Section 25.09.240, short subdivision and subdivisions in environmentally critical areas;*

The site is not located in any mapped or observed environmentally critical area as defined in SMC Chapter 25.09. Therefore, this section is not applicable to the short plat application.

6. *Is designed to maximize the retention of existing trees;*

The survey indicates that there were no existing trees on site, even prior to the construction currently under way. Proposed landscape plans were reviewed under 3004778, the Master Use Permit that included design review.

Summary - Short Subdivision

Based on information provided by the applicant, referral comments from DPD, Water (SWD), Fire Department (SFD), Seattle City Light, and Parks and review by the Land Use Planners, the above cited criteria have been met subject to the conditions imposed at the end of this decision. The lots to be created by this short subdivision will meet all minimum standards or applicable exceptions of the set forth in the Land Use Code, and are consistent with applicable development standards. As conditioned, this short subdivision can be provided with vehicular access, public and private utilities and access (including emergency vehicles). Adequate provisions for drainage control, water supply and sanitary sewage disposal have been provided for each lot and service is assured, subject to standard conditions governing utility extensions. The proposal site is not located in an environmentally critical area; therefore SMC 25.09.240 is not applicable. The proposed plat maximizes the retention of existing trees. The public use and interest are served by the proposal since all applicable criteria are met and the proposal creates the potential for additional housing opportunities in the City.

**DECISION - SHORT SUBDIVISION**

The proposed Short Subdivision is **CONDITIONALLY GRANTED**.

**CONDITIONS - SHORT SUBDIVISION**

Conditions of Approval Prior to Recording

The owner(s) and/or responsible party(s) shall:

1. Have final recording documents prepared by or under the supervision of a Washington State licensed land surveyor. Each lot, parcel, or tract created by the short subdivision shall be surveyed in accordance with appropriate State statutes. The property corners set shall be identified on the plat and encroachments such as side yard easements, fences or structures shall be shown. Lot areas shall be shown on the plat. All existing structures, principal and accessory, shall be shown on the face of the plat, and their distances to the proposed property lines dimensioned. Add the conditions of approval to the face of the plat.
2. Submit the final recording forms for approval and remit any applicable fees.
3. Add all conditions of approval to the face of the plat.

Prior to Issuance of any Building Permit

4. Attach a copy of the recorded short subdivision to any sets of building permit application plans, if applicable.

Prior to Final Approval or Certificate of Occupancy

None.
